Education

Monroe High School

Monroe, Michigan

- Graduated with a 3.7 GPA
- Pursued technical experience through extracurricular classes such as compTIA A+, cybersecurity, artificial intelligence, and computer networking.

Relevant Technical Coursework

Infosec - CISSP

- Attained the fundamentals of cybersecurity and technical security from an administrative standpoint.
- Gained knowledge of the C.I.A. Triad and Risk assessment.
- Expanded the knowledge of network security and the various models within it.

FreeCodeCamp - Web development

- Achieved a certificate in responsive web design.
- Gained the knowledge of HTML5, CSS3, and Javascript.
- Improved upon these skills from course based projects.

Mike Meyers - CompTIA A+ 220-1101

- Learned essential hardware vocabulary and rules.
- Acquired skills in troubleshooting and networking.
- Solidified knowledge in mobile and laptop devices and components.

Projects

Web development & Graphic design

Web development - [Github](#) - [Portfolio website](#)

- Developed a functional calculator using HTML5, CSS3, Javascript, and JQuery - Four days. It was a good test for my JQuery and Javascript functional programming skills.
- Built my own portfolio website using HTML5 and CSS3 - One week. This was a great challenge for me because I coded this website with no design framework, and I learned valuable CSS and HTML skills.
- Constructed a weight converter using HTML5, CSS3, Bootstrap 4, and Javascript - Five days. This was a tough but valuable challenge for me, and one of my first Javascript projects.
- Computed a simple to-do list using the tools HTML5, CSS3, Javascript, Bootstrap 4, and JQuery - Two days. This challenge, although very simple, enlisted me to think a lot about how to implement more features into it.

Graphic design - [Behance](#) - [Portfolio website](#)

- Visualized a movie app UI and built it using Adobe Photoshop and Adobe Illustrator - One week. This project I designed was to put my experience in these tools into UX/UI design. It was a fun and interesting project for me.
- Created a wine brand and constructed the perfect design tailored to it, using Adobe Photoshop and Adobe Illustrator- Three days. I loved this project because I specialize in brand identity related work, and this seemed like the perfect match for me.
- Revamped a car advertisement using Adobe Photoshop and Adobe Illustrator - Three days. This project was seamlessly brought together for me, the ideas came together perfectly, and I constructed a visually appealing and professional car advertisement.

Skills & Interests

Technical: Adobe Photoshop, Adobe Illustrator, Cinema 4D, Javascript, Python, HTML, CSS, Bootstrap, jQuery, Microsoft Excel, Microsoft Word, IT, Networking, Github, Typography, Adobe InDesign, Computer hardware, Computer science, VMware, VPN, Software troubleshooting, TeamViewer, Ubuntu, DNS, TCP, LAN.
